Erson's premium 8660 steel roller cam cores offer the highest degree of reliability and feature Everwear-gear™ distributor gears. Please consult Erson's Technical Personnel for your specific camshaft requirements. We have developed new lobe profiles that offer the latest in lobe design for high RPM and high rocker arm ratios. PBM-Erson offers an engineered valvetrain system, ie: valve springs, lifters, retainers, locks, and pushrods that are matched to our specific cam designs to ensure maximum performance and reliability. Other applications available, please consult catalog.
